Abstract (en)

[origin: WO2020125874A1] The invention relates to a commutator motor having a housing, a rotor bearing a winding and a commutator and being rotatably mounted about a rotor axis, a permanent magnet stator, a brush support plate (7), arranged substantially at a right angle to the rotor axis and having brushes (8) which are in contact with the commutator, and a circuit board (9) received in the brush support plate (7). The aim of the invention is to provide for simple and reliable installation of a commutator motor of this type.
