Abstract (en)  
[origin: CN113263466A] The invention relates to a turn-off torque wrench device (10) having at least one control and/or regulating unit (14) which, in at least one screwing operating state (16), carries out at least one screwing program (18) having at least one screwing program step (20) for actuating a tool (22). According to the invention, the control and/or regulation unit (14) executes at least one test operating program (26) in at least one test operating state (24).
