Abstract (en)

An insulation wall fixing device for a liquefied natural gas storage tank is disclosed. The present invention relates to a fixing device for securing a primary insulation wall to a secondary insulation wall in a liquefied natural gas storage tank, the fixing device comprising a base socket mounted on a groove formed on an upper surface of a secondary insulator of the secondary insulation wall, wherein the base socket has a lower circumference protruding in a step shape such that a step portion of the base socket supports a lower surface of an upper protective plate of the secondary insulation wall.
