Abstract (en)
[origin: WO2020136252A1] Heated hair styling accessory extending longitudinally along an axis (X-X') between a proximal end and a distal end, the accessory comprising an at least partially hollow grip portion (24) which extends longitudinally along and around the axis (X-X') and is assembled on the distal end, the grip portion (24) being designed to be grasped by the user of the accessory, characterised in that the grip portion (24) is free to rotate relative to the accessory (2) and in that the distal end extends inside and in contact with the grip portion (24) longitudinally along the axis (X-X'), the distal end providing a first rotational guidance for the grip portion (24) relative to the accessory at a plurality of points along the axis (X-X').
