Abstract (en)

[origin: WO2020136227A1] The invention concerns a hairstyling appliance (1) comprising a blower module for generating an air flow, a heating element (24), a handle (2) and a blowing head (6) connected to the handle (2), the blowing head (6) having a first air outlet (7) and a second air outlet (8), and being mounted to move relative to the handle (2) between a first position in which the air flow is blown through the first air outlet (7) and a second position in which the air flow is blown through the second air outlet (8), the apparatus comprising automatic means (33) for adjusting the operation of the blower module (5) and the heating element (24), which automatic adjustment means (33) control the operation of these in the position occupied by the blowing head (6) relative to the handle (2). - Hairstyling appliances.
