Abstract (en)

[origin: WO2020136228A1] The invention relates to a hairstyling device (1) comprising a blower module (2) for generating an air flow, a blower head (3), an electronic module (26), which electronic module is housed within said blower head (3), and a bypass channel (30) designed to capture a portion of the air flow generated by the blower module (2) in order to cool said electronic module (26).
