Abstract (en)

[origin: WO2020135961A1] The invention concerns an adapter (300) for fastening a windscreen wiper blade (500) on a hinged arm (600) of a wiper system (700), the adapter (300) being mounted to pivot on a connector (200) of the windscreen wiper blade (500). The adapter (300) comprises two side walls (320, 330) connected together by an upper wall (340) and together forming a housing (350) for the connector (200). According to the invention, at least one of the side walls (320, 330) of the adapter (300) comprises one or more grooves (100) which extend longitudinally between the two longitudinal ends (321, 331, 341, 322, 332, 342) of the adapter (300) in order to allow a contact-free insertion of a folded tab forming a tongue (656) on an edge (651, 652) of the yoke (650) of the hinged arm (600). Said invention applies to motor vehicles.
