Abstract (en)

[origin: WO2020135960A1] The invention relates to an adapter (300) for attaching a wiper blade (500) to an articulated arm (600) of a wiping system (700), the adapter (300) being pivotally mounted on a connector (200) of the wiper blade (500). The adapter (300) comprises two lateral walls (320, 330) joined together by an upper wall (340) and forming a recess (350) for the connector (200). At one distal end of the lateral walls (320, 330) relative to the upper wall (340), the connector comprises a lower bearing surface (323, 333) designed to cooperate with a folded edge (655) of the cover (650). According to the invention, the recess (650) opens lengthwise at the two longitudinal ends of the adapter (300). The invention also relates to a wiper blade comprising such an adapter (300) mounted on a structure (400), and to a wiping system (700) comprising such a wiper blade (500). The invention is applicable to motor vehicles.
