Abstract (en)

[origin: WO2020136345A1] The invention concerns a support and attachment base (10) of an on-board system for supporting an on-board system on a support surface and for attaching it to a locking system equipped with locking members. This base comprises a planar attachment face (12), a support wall (14) parallel to the attachment face (12), connecting elements (16) perpendicular to the attachment face (12) securing the support wall (14) and the attachment face (12), removable assembly elements (18) provided on the attachment face (12), and, through the support wall (14), a locking opening (20) for the insertion of the locking members into an inner housing (22) defined by the attachment face (12), the support wall (14) and the connecting elements (16).
