Abstract (en)

[origin: WO2020139272A2] The invention relates to a water drainage system enabling to drain the flushing water, which is stored within a water tank located on the smart toilet covers, in case said flushing water reaches the maximum level. The drainage system according to the invention comprises in its most basic form at least one water tank/flush tank (S) main body (A) and the water drainage channel (2) positioned on the main body (A).
