Abstract (en)  
[origin: WO2020135986A1] A cooking device (1) comprising a cooking cavity (2) wherein the foodstuffs to be cooked are placed; a casing (3) in the front of a box with front side open which has a plurality of walls enclosing the cooking cavity (2); a plurality of support members (4) which are disposed on the side walls so as to support one or more trays; a door (5) which provides access into the cooking cavity (2); a control panel (6) which is provided on the casing (3) and which enables the parameters of the cooking process and the type of foodstuff to be selected; a control unit (7) which controls the cooking process; at least one indicator (8) which is provided on the front wall of the casing (3) and which corresponds to each support member (4); an embossment (9) which is provided on each indicator (8); and at least one light source (10) which is disposed on the front wall of the casing (3) so as to remain between each indicator (8) and each embossment (9), wherein the control unit (7) provides that the embossment (9), which corresponds to the support member (4) whereon the foodstuff placed into the cooking cavity (2) must be placed depending on the type thereof, is illuminated by means of the light source (10).
