Abstract (en)

[origin: WO2020135978A1] The present invention relates to a cooling device (1) comprising a body (2); a door (3) which covers the body (2), which provides access into the body (2) and which has an upper side (19), two lateral sides (18) and a lower side (17); at least one hinge (4) which enables the door (3) to be connected to the body (2) in an openable/closable manner; and a protrusion (14) which is provided at one end of the hinge (4) and which creates an elevation from the surface of the hinge (4) towards the lower side (17).
