Abstract (en)

[origin: WO2020164991A1] The invention relates to a method for transmitting a message in a computing system (1), having the steps of: sending the message by means of a transmitter (S) and receiving the message by means of a receiver (E), wherein the transmitter (S) is granted access to a memory area (2) for the purpose of sending, the transmitter (S) has the access to the memory area (2) withdrawn after the sending, and subsequently the receiver (E) is granted access to the memory area (2) for the purpose of receiving, and wherein the transmitter (S) is allocated a first virtual address (P1) for the access to the memory area (2) and the receiver (E) is allocated a second virtual address (P2) for the access to the memory area (2), the first virtual address (P1) being different from the second virtual address (P2).
