Abstract (en)  
[origin: WO2020139221A1] The present invention relates to a motor (1) comprising a connection table (2) wherein nine connection elements (6) are positioned so as to form a 3x3 matrix, which are composed of a mains connection group (3) which provides the connection of the motor (1) to the mains and which comprises three connection elements (6), a central connection group (4) which is positioned parallel to the mains connection group (3) and which is composed of three connection elements (6) and a motor connection group (5) which is connected to the motor (1), which comprises three connection elements (6) and which is positioned in the same manner as the other connection elements (6).
