Abstract (en)

The present disclosure provides a filter device kit for a respiratory mask, comprising a base member comprising an inner surface and an outer surface, the outer surface comprising a first fastening means configured for fastening the filter device to the respiratory mask, a cap member comprising an inner surface and an outer surface and a filter material, in particular, a non-woven filter material, wherein the base member and the cap member are configured to be detachably fastened to each other with the filter material positioned between the inner surface of the base member and the inner surface of the cap member. Further, it is provided a filter device comprising the filter device kit, wherein the base member and the cap member are detachably fastened to each other with the filter material positioned between the inner surface of the base member and the inner surface of the cap member.
