Abstract (en)

The invention relates to a bowl pump and a vertical bowl pump arrangement. The bowl pump (1) comprises a pump housing (10), a hub (14) and guide vanes (23) extending between the hub (14) and pump housing (10). The guide vanes (23) has a positive lean angle, i.e. a mean radial span vane angle determined as a mean value of a pressure side radial span (26) vane angle ( $\alpha$ ) and a suction side radial span (27) vane angle ( $\beta$ ) is equal to or more than 30 degrees from 0,1 to 0,2 relative axial position of the guide vane (23).
