Abstract (en)

[origin: EP3904801A1] The present invention relates to a refrigerator (1) comprising a body (2); a crisper (3) which is disposed in the body (2) and wherein the vegetables and fruits are placed; at least one light source (4) which emits light into the crisper (3); and a glass (6) which is positioned so as to cover the light source (4) and which has at least two colors to simulate the sunlight, characterized by a shaft (9) which is connected to the glass (6) or the light source (4), a motor (8) which enables the shaft (9) to be moved, and a control unit (10) which enables the motor (8) to trigger the shaft (9) such that the light source (4) sweeps the colors on the glass (6) in an order predetermined by the producer.
