Abstract (en)

[origin: WO2020193365A1] The invention relates to a method for stencil printing a magnetic laminate onto a printing surface. A stencil with at least one first and a second part is used, and the first and second part cover a non-continuous region of the printing surface. The printing device has a printing surface, a printing head, and a printing frame located between the printing surface and the printing head, wherein the first part of the stencil is arranged on the printing frame, and the second part of the stencil is arranged on the printing surface.
