Abstract (en)
[origin: EP3906900A1] Vaginal device (1) for pelvic organ prolapse treatment, having an elongated base element (2), an inflatable element (3) attached to a distal end part (2a) of the elongated base element, and a support element (4) attached to a proximal end part (2b) of the elongated base element. The support element has at least two support members (5), which extend away from the proximal end of the elongated base element.
