Abstract (en)
[origin: CN114649704A] The invention relates to an outer conductor structure for a connector. The outer conductor structure is provided with an outer conductor base body and an outer conductor ring. Wherein the outer conductor base body is provided with a plurality of contact lugs; wherein the outer conductor ring is mounted on the interface-side end of the outer conductor base body, has at least one projection or recess, and has a closed structure; wherein the outer conductor ring is designed to protect the contact lug from mechanical forces.
