Abstract (en)
[origin: WO2020144016A1] The invention relates to an operating device (100, 300) and a corresponding method for operating at least one appliance, wherein the operating device (100, 300) has a surface (301) having a shape and having a display (1021, 1022, 3021, 3022, 3023), and wherein, when an operating member (F) is brought closer to the operating device (300), the shape of the surface (301) changes and the display (1021, 1022, 3021, 3022, 3023) is switched on, wherein, when the operating member (F) penetrates a first region (201) further away from the operating device, the display (1021, 1022, 3021, 3022, 3023) is completely/or partly switched on, and when the operating member (F) penetrates a second region (202) closer to the operating device, the shape of the surface (301) is changed to form deformations (1011, 1012, 3011, 3012, 3013, 3014, 3015, 3016).
