Abstract (en)
[origin: WO2020144349A1] The invention relates to a stack arrangement of at least two identical bottle crates (1) for receiving bottles (5), each bottle crate (1) comprising at least one crate bottom (7), four side walls (2) and a divider unit (3) between the side walls (2) with compartments (4) for receiving the bottles (5). According to the invention, the compartments (4) are arranged nesting within one another, and the bottle crates (1), when filled, can be stacked nesting inside one another in the vertical direction by means of rotating stacking to provide a stack arrangement of at least two identical bottle crates 1 with which the carrying capacity of a Euro pallet is increased.
