Abstract (en)
[origin: WO2020145948A1] A shatter-resistant container in the shape of a large wine bottle with an insulated chamber. The container is designed for use in an area such as a pool or beach where glass is restricted. The container has a removable neck which permits a full bottle of wine to be poured quickly into a large opening in the insulated chamber. A base can be removed to access a storage compartment which holds a pair of disassembled stemmed wine glasses or stemless glasses made of a shatter-resistant polymer. The neck includes a cap or valve and an aerator, so that wine is aerated as it is poured from the container.
