Abstract (en)

[origin: WO2020143412A1] The present disclosure provides a UE and a method at a UE. The method includes: mapping an uplink grant with a logical channel, according to an LBT parameters associated with the uplink grant, the LBT parameters being related to at least one of a CAPC value, an LBT type, an LBT category, a channel sensing duration, a transmission time of an uplink data channel corresponding to the uplink grant and a random back-off time length; and performing the data transmission of the logical channel using the uplink grant. The present disclosure further provides a network node and a method at a network node, and corresponding computer readable storage media.
