Abstract (en)
This invention relates to a truck mounted forklift (TMFL), more specifically an electrically powered TMFL. The TMFL (1) comprises a U-shaped chassis (3) having a pair of forwardly projecting side bars (5, 7) bridged by a rear cross bar (9), a pair of front wheels (25, 27), one at the forwardmost end of each of the side bars, and a rear wheel (29) located substantially centrally on the rear cross bar, a lifting assembly (15) mounted on the U-shaped chassis comprising a fork carriage (19) and a pair of forks (21, 23) mounted on the fork carriage, the lifting assembly being configured to provide adjustment to the height and the reach of the forks, a driver's station (11) mounted on the chassis and a battery pack (13) mounted on the chassis, and in which each of the front wheels is provided with a dedicated electric wheel motor assembly (31), each of the electric wheel motor assemblies comprising an interior permanent magnet (IPM) motor (33) having a drive shaft (35), a planetary gear box (37) coupled to the IPM motor, the planetary gear box being mounted axially in-line with and driven by the drive shaft (35), in which the IPM motor (33) is mounted substantially internal the side bar (5, 7) and the planetary gear box (37) is mounted substantially internal the bounds of a wheel rim (39) of the front wheel (25, 27).
