Abstract (en)
[origin: EP3910207A1] An actuator (10) is equipped with a body (18) and a slider (40). Body side rail grooves (90) are formed in side wall portions (22, 23) that constitute the body (18). On the other hand, slider side rail grooves (128) are formed in the slider (40). Body side guide rails (100) and slider side guide rails (140) are provided in the body side rail grooves (90) and the slider side rail grooves (128), respectively. Circular arc grooves (152, 154) serving as ball grooves are formed by body side ball receiving portions (114, 116) of the body side guide rails (100), and slider side ball receiving portions (146, 148) of the slider side guide rails (140).
