Abstract (en)
[origin: WO2021148155A1] The invention relates to a charcoal headpiece for a water pipe that comprises, at its lower end, a closed water container, to the upper region of which a suction tube is attached above the water level, and into which a vertical smoking pipe opens below the water level, a water pipe head being releasably fastened to the upper end of the smoking pipe, said head having a head base and a charcoal headpiece releasably situated on the base, the headpiece having a lower ash receiving chamber and, above said chamber, a grille for supporting glowing charcoal pieces which heat the tobacco. The charcoal headpiece consists of a lower part and an upper part lying interlockingly on the lower part, and the lower part forms the receiving chamber for the charcoal ash and has a perforated base and an outer annular wall encircling the base, wherein: the grille for the charcoal pieces is height-adjustably mounted inside the annular wall above the base, at a distance from the latter; the upper part covers the ash receiving chamber and the grille, hood-like, and the annular edge of the upper part lies interlockingly on the annular wall of the lower part.
