Abstract (en)

[origin: CN111434266A] The invention relates to a tank (2) intended for containing a liquid to be vaporized and for being assembled with a main body (1) of a hairdressing apparatus, said tank (2) being intended for being connected with a vaporizing device of the hairdressing apparatus designed for vaporizing the liquid and diffusing it towards a strand of hair. According to the invention, the tank (2) has a movable hooking device (3) comprising at least one hooking means designed to correspond with at least one complementary hooking means belonging to the main body (1) so as to hook the tank (2) with the main body (1), said movable hooking device (3) being movable between a first position providing the hooking of the tank (2) with the main body (1) and a second position allowing a user to assemble or disassemble the tank (3) with the main body (1).
