Abstract (en)
[origin: WO2020148212A1] Foldable container, having a collapsed state (2) and a deployed state (1), wherein the container comprises: a base (3); a sidewall assembly (24) comprising at least four side walls (4) rotatably fixed to one another along their container edges (5); a hinge (6), connecting one of the side walls to the base along the lower edge of said side wall; a container cover (7), connected to a sidewall (4c), pivotable around the upper edge of said side wall; wherein the container has a substantially cuboid form in the deployed state (1), and the side walls are folded together in the collapsed state; and the container cover (7) is connected to the side wall (4) by at least one kinematic chain (8).
