Abstract (en)
[origin: WO2020147882A1] A harmonic drive (1) comprises three connection elements (2, 9, 12), namely an input element (2), an output element (13) and an adjusting element (9), and an antitwist mechanism (15) operates between the connection elements (2, 9, 12), the antitwist mechanism comprising an antitwist element (18), which is concentric to the connection elements (2, 9, 13) and interlockingly cooperates with one of the connection elements (9) and frictionally cooperates with one other connection element (2).
