Abstract (en)

[origin: WO2020148087A1] A method for securely transferring a file (F) between a first computer device (100) that is designed to securely transfer files and a second computer device (200) that is not designed to securely transfer files, via a cloud-based platform (P) using symmetrical encryption (A) of a file (F) to be transferred with a symmetrical file key (SK), and asymmetrical encryption (B) of the randomly generated file key (SK) with the public key (AK1) of an asymmetrical key pair (AK) consisting of the public key (AK1) and the private key (AK2).
