Abstract (en)
[origin: EP3912898A1] The invention relates to an outboard yacht pool, comprising a retractable structure (1; 2; 3; 4), which is substantially polygon-shaped and intended to be fixed at a point in the hull of a yacht, and a containment element (50) connected to said structure (1; 2; 3; 4) and defining walls of said pool, wherein said structure (1; 2; 3; 4) includes at least a first element (11; 20; 31; 410) configured to be fixed laterally to the hull of said yacht and connected to a plurality of arms (12, 13; 21, 22; 32, 33; 40, 43) interconnected with each other to form said polygon and configured to be moved by moving organs (150; 205, 250; 313, 350; 450), characterized in that said structure (1; 2; 3; 4) is configured to switch, by means of the action of said moving organs (150; 205, 250; 313, 350; 450), between a first retracted configuration, in which said pool is not in use and said structure (1; 2; 3; 4) is folded on itself in a position adjacent to the hull of said yacht, and a second extended configuration, in which said structure (1; 2; 3; 4) projects with respect to said yacht and is located close to the surface of the water, and wherein said containment element (50) is extended and immersed in water and connected below said structure (1; 2; 3; 4).
