Abstract (en)
A drive point (100) for a tubular driven pile (1), and an arrangement comprising the drive point. The drive point comprises a series of ribs, wherein the series of ribs comprises- outer ribs (2) extending from an outer circumference (14) of the drive point towards a centre axis (C) of said drive point, wherein the outer rib (2) is provided with an inner face (5) faced towards said centre axis (C) of the drive point, and wherein said inner face (5) is arranged to slant in respect to the centre axis (C) of the drive point, or- inner ribs (3) extending from direction of the centre axis (C) towards the outer circumference (14) of the drive point, wherein the inner rib (3) is provided with an outer face (6) faced towards outer circumference of the drive point, and wherein said outer face (6) is arranged to slant in respect to the centre axis (C) of the drive point.
