Abstract (en)

[origin: WO2020151841A1] The present invention relates to a system for warming blood, in particular to carry out Extracorporeal Hyperthermia Perfusion (EHP) therapy. Further, the present invention relates to extracorporeal blood above normal body temperature for use in the treatment of a disease selected from the group consisting of cancer, an autoimmune disease, an infectious disease, an inflammatory disease, and sepsis. Furthermore, the present invention relates to a combination of extracorporeal blood above normal body temperature and a chemotherapeutic agent for use in the treatment of cancer.
