Abstract (en)

[origin: WO2020152639A1] The present disclosure envisages a mounting assembly (300, 400, 500) for mounting a powertrain (100) on the rear of the chassis (200) of a three-wheeled vehicle. The mounting assembly (300, 400, 500) comprises a bracket and an anti-vibration mount (380, 480, 580). The bracket (320, 420, 520) is configured to be attached to the powertrain (100). The anti-vibration mount (380, 480, 580) is coupled to the bracket (320, 420, 520) and is configured to be attached to the chassis (200) of the vehicle. Also envisaged is a mounting arrangement which includes at least three mounting assemblies (300, 400, 500) for mounting the powertrain (100) on the chassis (200) of the vehicle. The mounting assembly isolates vibration of the powertrain from transmitting to the vehicle chassis, enhances comfort of the passenger and is convenient for installation.
