Abstract (en)
[origin: WO2020152411A1] Disclosed is a rigid packaging comprising: - a skeleton (30) made of thermoplastic material, this skeleton comprising strands (42) which form meshes of a grid which defines the framework of a side wall (16) of the packaging, - a sheet (32) comprising: • an inner layer made of thermoplastic material, heat welded on the strands (42) of the skeleton, • a cardboard layer, the mass of which represents more than 50% of the total mass of the sheet, - the heat-welded sheet comprising a gripping appendage (62) for the hand of a human being, this appendage being rigidly attached to the cardboard layer and enabling, by manually pulling on this appendage, the manual peeling of the cardboard layer in order to mechanically detach it from the inner layer.
