Abstract (en)
[origin: WO2020154211A1] A label laminate comprising a filmic or a paper substrate, said substrate having a first surface and a second surface; a pressure sensitive adhesive (PSA) layer, said PSA layer being tacky and having a first surface and a second surface, the first surface of the PSA being in contact with the second surface of the substrate; and a detack layer on top of the second surface of the PSA layer, said detack layer having a melting point above about 50C, wherein the detack layer has a surface coverage of less than 100% of the second surface of the PSA layer.
