Abstract (en)

[origin: WO2020151826A1] The invention relates to a load break switch device or to a fused switch device for receiving at least one fuse or a fuse plug for a fuse. The device according to the invention comprises a housing and at least one input terminal and at least one output terminal for connection to at least one electric device, wherein three-pole devices are preferably provided. The device according to the invention furthermore comprises a Rogowski coil provided on a base contact of the device.
