Abstract (en)

[origin: JP2021191938A] To provide a bracing device for attaching a lining frame to a structure to be lined.SOLUTION: A bracing device (10) for attaching a lining frame to a structure to be lined of this invention includes a main portion (11) extending in an axial direction, wherein one end thereof is fitted to a fixing plate to the structure to be lined, and the other end thereof is fitted to a piece for holding a film. The film holding component (M) includes a first jaw (15), and a second jaw (17). The second jaw includes two half jaws (170) which are assembled with each other by assembling means 18 so as to form the second jaw. The half jaw further includes coupling means (19) for coupling the second jaw with the first jaw.SELECTED DRAWING: Figure 14i
