Abstract (en)
The invention discloses a method for an exchange of data between a mobile device (100) and an additional mobile device (110) assigned to a means for passenger transport (200A, 200B, 200C,...). The method comprises the steps of recording an automatically readable information (300) via a mobile device (100) to create a first data connection between the mobile device (100) and a data server (400), exchanging real time information between a means for passenger transport (200A, 200B, 200C,...) and the data server (400); and creating a second data connection between the mobile device (100) and the additional mobile device (110) assigned to the means for passenger transport (200A) based on the real time information.
