Abstract (en)

[origin: WO2020156704A1] The invention relates to a roller blind web (1) for a roller blind system in a vehicle (20), said roller blind web (1) being able to be wound and unwound along a direction of deployment (26) and comprising: - a roller blind material (2), and - a functional element (7) that is connected to the roller blind material (2), is made using an additive manufacturing process and is composed of a plurality of layers (9). The invention also relates to a process.
