Abstract (en)

[origin: WO2020157592A1] A disposable and single-dose capsule (1) for a machine for preparing infused beverages, said capsule (1) comprising: a main body (100) shaped like a cup, having - a containment region (110) of a measured dose of a coffee powder; and - a dispensing region (120), which has a toroidal infusion chamber (121) and an outlet duct (122) in communication with the chamber (121) and configured for dispensing of the beverage; a membrane (400) separating the reception (110) and dispensing (120) regions, which is torn by the fluid pressure which is established within the main body (100) during the preparation of the beverage; a filtering disc (300) arranged within the containment region (110) and abutting on the membrane (400), which has a raised crown portion (310) provided with a plurality of openings (301), which crown portion (310) is arranged on the opposite side of the infusion chamber (121), wherein the fluid passing through the openings (301) of the crown portion (310) tears the membrane (400) and flows into the chamber (121) and from the latter through the outlet duct (122).
