Abstract (en)
[origin: WO2021244825A1] Described is a method for producing a protective mask (1), comprising: Placing two material layers (2, 4) of a flat material on top of one another to form a double-layer material mat (6), cutting a contour part (9) of a protective mask (1) from the material mat (6), wherein the contour part (9) has a basic section (11) on a front side (13) and a side section (12) integrally connected to the basic section (11) on a rear side (20) facing away from the front side (13), cutting a wing section (15) into the side section (12), wherein the wing section (15) remains integrally connected to the basic section (11) along a connection line (16) and extends from the connection line (16) towards the rear side (20), connecting the material layers (2, 4) along a front edge (14) of the basic section (11) at the front side (13) of the contour part (9), and connecting the material layers (2, 4) of the wing section (15) at a connection point (24) which is at a distance from the connection line (16).
