Abstract (en)
A non-slippery outsole article comprises a first sole (10) and a plurality of slip-resistant blocks (20). The first sole (10) has two opposite sections, a top section in contact with a shoe body and a bottom section in contact with ground. The slip-resistant blocks (20) are mounted in partition at the bottom section of the first sole (10), a plurality of protrusions (11) being mounted on the top section of the first sole (10). The slip-resistant blocks (20) are made of rubber and have a rough surface capable of slip resistance.
