Abstract (en)

[origin: EP3919679A1] The invention relates to a treatment section (150) of a production line (100) for producing a barrier coated fiber web, in particular a barrier coated carton board web, which treatment section comprises a coating section (60; 65) comprising an off-line melt coating polymer coater (60), advantageously extruder (60), and an unwinder (55) and a rewinder (70). The coating section (60; 65) comprises an off-line curtain dispersion coater (65). The unwinder (55) and/or the rewinder (70) are common to the off-line melt coating polymer coater (60) and to the off-line curtain dispersion coater (65).
