Abstract (en)
[origin: WO2020161063A1] The invention relates to a method for recovering phosphorus from sewage sludge in sewage plants, wherein: the sewage sludge is pre-acidified under anaerobic process conditions and the pH value is then increased to a pH value < 7 by adding at least one alkaline calcium-containing chemical; brushite crystals are formed by calcium ions of the chemical and are precipitated, and deposited brushite crystals are removed; and the phosphorus-reduced sewage sludge is then supplied to a digestion process.
