Abstract (en)  
[origin: WO2020160916A1] The invention relates to a drainage device (3) for connecting a drinking water system (1) to a wastewater pipe (12). The drainage device (3) comprises a collection tank (7) and connects the drinking water system (1) to a drainage connection (8) via a free dripping section (11). The drainage device (3) is characterised in that it is assigned a pump (10) which can empty accumulated liquid out of the collection tank (7) via a higher-positioned wastewater pipe (12). The invention also relates to a drinking water system (1) which comprises at least two water functional units (2) and a drainage device (3) and a feed pipe (19) which can be emptied. The invention further relates to a method for conducting water out of a drinking water system (1) into a wastewater pipe (12).
