Abstract (en)
[origin: WO2020161153A1] The invention relates to a cylinder head (1) for a piston compressor (3), which is intended to provide the most flexible arrangement possible of said piston compressor (3) without needing to make any structural modifications to the piston compressor (3), particularly to the cylinder head (1). According to the invention, to achieve this the intake connection (14) and/or the pressure connection (13) are designed to be adjustable into at least two positions on the cylinder head (1).
