Abstract (en)

[origin: WO2020161050A1] The invention relates to a multi-sensor apparatus for a motor vehicle, in particular a multi-sensor apparatus for equipping a motor vehicle with environmental sensors. The invention also relates to a method for equipping a motor vehicle with at least one environmental sensor, preferably such a method for adapting the vehicle equipment to a level of autonomy, by means of which the motor vehicle can be driven in an autonomous manner. The multi-sensor apparatus (1; 10; 100) comprises a multi-sensor carrier (2), which is designed to accommodate a plurality of environmental sensors and has a plurality of sensor holders (3) for this purpose, and at least two environmental sensors (4) which are held on the multi-sensor carrier (2) and are selected from a group of environmental sensors comprising a radar sensor (6), a LIDAR sensor (7), an ultrasonic sensor and a camera (5).
