Abstract (en)

[origin: WO2020161688A1] A distributed computing system, platform and method configured to enable the generation of a network of users of the system to participate in one more transactions and having, a network of user nodes in communication with one another, each node being associated with at least one processor and at least one computer readable medium for executing the one or more transactions with other user nodes in the network; a distributed ledger system capable of creating, maintaining and updating at least one blockchain indicative of the one or more transactions via the network of user nodes; and one or more databases accessible by the network of nodes for recording and reading data relating to the one or more transactions between the user nodes.
